How FAANG conducts System Design Interviews in 2025

After 3 rounds at Google and 2 at Meta, here are the patterns I noticed. First, always clarify requirements. Second, start with a high-level design before diving deep. Third, discuss trade-offs openly – they love that. The key shift in 2025 is AI-augmented systems – expect questions on how your design handles ML model serving at scale.

Ask the Alumni Network

Got a question about interviews, career paths, or company culture? Ask our alumni directly!

Your name *

Company / Topic context (optional)

What would you like to ask the alumni? *

Ask

Amit Kumar Google — 19 Feb 2026

"How should I prepare for Google SWE interviews in 3 months?"

Priya Sharma Software Engineer II @ Google — 19 Feb 2026

Focus on Leetcode medium problems, especially graphs and dynamic programming. Do 2–3 mock interviews per week using Pramp or with friends. Study system design from the Designing Data-Intensive Applications book. Month 1: DSA. Month 2: System Design. Month 3: Mock interviews + behavioral prep.

PAPER
5/12/2024
AI-Driven Traffic Management System for Smart Cities
IEEE International Conference on Smart Cities 2024
This paper proposes a novel approach to urban traffic control using deep reinforcement learning. By analyzing real-time camera feeds, the system optimizes traffic light timings to reduce congestion by 22%.
